Baby amazon leaves the nest box!

The first amazon born during the rehabilitation process has already left the nest box. Check out the videos in our [YouTube channel!](#)

Exhibit in the Continente Shopping mall

Traveling exhibition in São José, SC

The reintroduction of the vinaceous-breasted-amazon in the Araucárias National Park is the theme of the photographic travelling exhibition "Back to the forest" which is shown in the [Continente Shopping](#) from 24th of February to 26th of March. Free entrance. Do not miss it!

Environmental Education

Last month, Marcelo K. Sato, master student from São Paulo University, joined our team! He will be with us for the next months involving children from Passos Maia and Ponte Serrada in educational activities of storytelling linked to conservation and science outreach.

Like our [Facebook Page](#) and follow the narratives'

writing process which will be broadcasted as a radio novel and a short film!

What does a parrot and an ibis has in common?

[Ibising](#) is an European organisation dedicated to birds from the ibis and spoonbill family. But their awareness and concerns goes far beyond these species and so they joined the [Espaço Silvestre Institute](#) in the [vinaceous-breasted-amazon](#) protection! Selling the Scarlet ibis keychains handcrafted by the [Amigas dos Roxinhos](#) is the first result from this alliance for the

protection of Brazilian wildlife. Like the [Ibising facebook page](#) and buy the ibis keychain.

International guests

In February, we had the honor of receiving Roelant Jonker and Grace Innemee, our first Dutch guests! The director of the [City Parrots](#) and the [ABUN's](#) artist visited the Vinaceous-breasted amazon art exhibition in the city hall of [Ponte Serrada](#). We hope that everyone who participates in this wonderful initiative that brings together artists and biologists from all over the world can see their works exhibited in the city where the Araucarias National Park is located.

We won the Holohil Grant Program!

Espaço Silvestre Institute is the winner of the [Holohil Grant Program](#)!! We were granted some radio-collars which will be very important for monitoring the amazons which will be released this year in the [Araucárias National Park](#). We are very thankful to this world-renowned enterprise for believing and supporting our work.

Toward to the fifth release!

Sponsors

Our work is only possible thanks to [sponsors and partners](#). You can contribute with [monthly donation](#) starting from 20 dollars. You also can donate without spending any money, just by using the app [O Polen](#) during your online shopping.
